THE Kentucky Press Association will hold its Mid Winter Meeting at Frankfort, on January 23rd, with all the scribes, law makers and general roustabouts, who are always on hands during the Legislative Sessions, it would be a bad time to start a rough house. For swimming it will be entirely too cold, climbing none will be able, and the little entrance through the ground would be entirely too small to accomodate the stampedes.

HON. R. W. MILLER was rather an easy mark in the Speaker's race, but in the coming Congressional, fight he will tavel in all together a differnt style.

## UNJUST AND UNCONSTITUTIONAL.

That the bill for the regulation of railroad rates drawn up by members of the Interstate Commerce Commission and submitted to the Senate Committee on Interstate Commerce as a substitute for the Foraker bill is unconstitutional in certain of its provisions, is the opinion of some of the foremost lawyers of the country. In an interview in the Washington Times, Mr. Robert Mather, whom that paper describes as one of the greatest corporation lawyers of the country, points out some of the unjust and unconstitutional features of this bill.

His statement follows: "As an expression of the commission's desire for increased power, the bill is adequate and ample. As an attempt to meet the desire of the President that one administrative body be given the power to prescribe the rates in disputed cases it also goes the limit. It may be considered as a statement of the extreme to which Congress will be asked to go on this subject.

"It is difficult to believe, however, that the bill is in any real sense the measure of the Administration. For it is condemned as unconstitutional by a published opinion of the Attorney-General, so that it cannot receive the professional and official approval of that officer. And it seems to do violence to the President's expressed determination to secure a 'square deal' for the railroads. So it can't meet with the entire approval of Mr. Roosevelt.

## WHY ILLEGAL.

"As to the unconstitutionality of the bill.

"It clearly confers upon the commission:

"First—The conceded judicial function of determining whether a given rate is or is not reasonable; and

"Second—The confessedly legislative function of establishing a rate in the place of the one condemned.

"Of such legislation Mr. Moody has said: 'The nature of legislative and judicial powers is such that they cannot be joined together and vested in the same body consistently with the theory which underlies the Constitution.'

"The situation that will be presented if the bill becomes a law will be more obnoxious than that denounced in the opinion of the Attorney-General for the commission already possess and exercises many executive functions.

"So that under the proposed bill there will be combined in one body, for the first time, the executive, judicial and legislative power. Mr. Moody cannot approve of this jumble of Governmental functions.

"The case made by the bill is even worse than this. For it not only vests in the commission powers pertaining to all three departments of the Government, but seek to limit the courts in the exercise of their accustomed functions. The courts are forbidden to restrain the enforcement of an order of the commission fixing a rate, for a longer period than sixty days from the date of service of the order upon the carrier, unless it plainly appears that the order is unlawful.

"Courts of equity possess and have always exercised the inherent power to restrain the performance of an act or the enforcement of a right upon good cause shown in

action and the sufficiency of the cause is addressed to the court's discretion. This power the bill proposes to take away, and to permit a restraining order only upon such showing as would justify a decree on final hearing. This attempted destruction of the established equitable powers of the court may furnish a second ground for holding the act, if passed, unconstitutional.

## NO SQUARE DEAL.

"The provision of the bill also gives ground for the claim that it denies a 'square deal' to the carriers. The basis of a legislative act by which the commission establishes a rate is the judicial proceeding by which it determines that the rate complained of is unreasonable. That judicial proceeding necessarily takes a wide range—involving the effect of the proposed reduction not only upon the revenues of the carrier but also upon its other rates, and upon the welfare of the industries and communities effected by the change.

"A rate that seems on its face to take much money from this or that individual, from this or that commodity or industry, or from this or that locality, is often justified by circumstances that lie entirely outside the mere question of the amount of the charge. By all these considerations the reasonableness of the rate is judged. And the commission in inquiring into the reasonableness of any contested rate does or should go into all these circumstances affecting the rate.

"But a court confined in its authority to the suspension of the order of the commission only, it plainly appears that the order is unlawful, but not otherwise, as says the bill, is shut out from a consideration of these collateral circumstances, which, in nine cases out of ten, are the really controlling influences in the making of the rate. The sole inquiry of the court must be: What is the effect of this order upon the carrier's revenues? If, in spite of this order, the carrier can still earn the reasonable return upon its investment, to which, under the law, it is entitled, it does not plainly appear that the order is unlawful, and it will not, therefore, be disturbed.

"These quoted words are designed to deprive the carriers of any effective review by the courts of the process of investigation by which the commission may reach the conclusion that any challenged rate is unreasonable, and the words are potent to effect that design.

"If the carriers are to have a 'square deal' in this proposed legislation, it is essential that there should be clear and adequate provision empowering the courts, on review of the commission's order, to take into consideration all the circumstances and conditions which the commission could consider, and to determine the very question, determined by the commission, namely: Is the rate complained of, under all the circumstances controlling or affecting it, fair, just and reasonable? Otherwise, rates established by the commission unreasonably low in themselves or with reference to controlling conditions, but not amounting in their effect upon the carrier's revenues to a deprivation of property, would not be subject to any adequate judicial review.

"In the absence of opportunity for more careful consideration of the other features of the bill, I prefer not to speak of them now."

S. C. Franklin, our optician, is taking a mail post course from a Western College of Optics which will prepare him better than ever for the practice of his pride profession, — Doctor of Optics.

W. T. Evans, the successful traveling salesman of Brodhead, was in Louisville this week and renewed his contract with that splendid firm Floyd & Bohr. He also spent a few days with his daughter at Bedford Ind.

BURNED.—While staying by the fire Monday the clothing of Miss Annie Ferrell caught fire and she was seriously burned about the body. Her mother, Mrs. Eliza Joplin, while trying to extinguish the flames was burned very badly.

DEAD.—Mrs. Tip Herd, after an illness of several weeks, died last Saturday night. The burial took place Monday in the Livesay burying ground. Out of Mr. Herd's large family of ten only three are left, himself and two daughters.

## IN MEMORY OF MRS. J. S. REPPERT.

On the evening of Dec. 28th, after an illness of six weeks, death released her from suffering this noble wife and mother. For twenty years she had reigned queen of her country home "RavensWood," in Rockcastle county, one of the most hospitable in Kentucky. Here her beloved children, three sons and two daughters, all living in different States, made frequent visits to enjoy the parental love, and cheer the declining years of their fond parents.

Maggie Vankirk Reppert was born in Washington, Pa., Sept. 30, 1832. She was a graduate of Washington Seminary and in 1858 was led to the marriage altar by J. S. Reppert, a student from West Virginia. After marriage Kentucky became the adopted home of the happy young couple and here beneath her sunny skies 47 years of married life were spent. No unkind words ever marred the happiness of their lives.

Her sensitive soul was shielded from the storms of life and the cold winds of adversity by the love and devotion of her husband, who during the last weeks of her illness seldom left her side, giving her every care and attention.

So gently had the cares of life sat upon her that, although 73 years old, her auburn hair was as glossy and free from gray as that of a girl.

Her sunny, kind disposition has helped to brighten life's journey for many a weary, way-farer. When the final summons came she showed her beautiful Christian faith by saying "His will not mine be done."

On the 47th anniversary of her marriage her loved ones laid her to rest in a beautiful pine grove near her home, where the birds will sing and the flowers will bloom over the grave of one of the purest and sweetest of earth's daughters. R.

## Impoverished Soil

Impoverished soil, like impavenished blood, needs a proper fertilizer. A chemist by analyzing the soil can tell you what fertilizer to use for different products.

If your blood is impoverished your doctor will tell you what you need to fertilize it and give it the rich, red corpuscles that are lacking in it. It may be you need a tonic, but more likely you need a concentrated fat food, and fat is the element lacking in your system.

There is no fat food that is so easily digested and assimilated as

## BAPTISM OF BLOOD

Heavy Fighting in the Streets of Moscow With Many Slain on Both Sides.

## THE GOVERNMENT IS HOPEFUL.

The Revolutionaries Made Good Their Threat to Transfer the Strike Into Armed Rebellion.

If a Foothold Can Be Secured It is the Revolutionaries' Intention to Set Up a Government and Proclaim a Republic.

Moscow, Dec. 25.—Severe fighting took place in the streets in this city Saturday. The ancient capital of Russia was converted into a gory shambles. Arsenal canons and machine guns of English make were used. Many troops were cut to pieces by the hell of bullets from the housetops. The killed and wounded on both sides number thousands. The situation is hourly growing worse. Twenty-five thousand troops were used against the armed revolutionaries.

St. Petersburg, Dec. 25.—With Moscow's baptism of blood, the revolutionaries made good their threat to transform the strike into armed rebellion, and the next 48 hours should determine whether they can marshal sufficient strength to plunge the country into an actual state of civil war and seriously threaten the immediate downfall of the government.

The government professes confidence that the whole attempt will fail owing to the woeful insufficiency of arms in possession of the proletarian and by reason of the loyalty of the army as a whole; but its calculations might again be rudely upset. A few arsenals might be seized to furnish arms or the open support of a few regiments might start a landslide in the army. Certainly the shrewdest of the revolutionary leaders fully appreciate that the issue must be decided by the attitude of the army, which is yet to cast its die.

While the military succeeded everywhere in driving the insurgents from their barricades in Moscow Saturday night, the defeat evidently was not a decisive one, as barricades were again thrown up in dozens of places Sunday morning and fighting was renewed before 11 o'clock.

London, Dec. 26.—The correspondent of the Daily Telegraph at St. Petersburg, in a dispatch dated at 6:45 p.m., December 25, says:

"At an early hour this morning the casualties at Moscow were estimated at 5,000 killed and 14,000 wounded, with the fighting still proceeding. The inhabitants of Moscow have been forbidden to leave their dwellings after 7 o'clock in the evening. It is impossible to move about the city in consequence of the frequency of stray bullets. Many innocent persons have been accidentally killed. A scarcity of provisions is threatened."

"The driving force behind both the troops and the rebels is no longer that of enthusiasm or of any human impulse. It is the force of superhuman hate, and hence the deeds reported are not the acts of patriots, soldiers or otherwise, but the enormities of madmen."

"For every barricade destroyed Sunday two or three appeared in other places. Orders were given by the revolutionaries to shoot only when there was good hope of bringing a man down, but otherwise to fire out of the troops until they lost patience."

"In the meantime in their houses the bulk of the population cowers in the innermost recesses of kitchens and cellars, stricken with fear and trembling at every boom of the cannon or the explosion of a bomb."

"The most surprising thing of all is the loyalty of the troops, which nobody here anticipated."

"Body here anticipated."

"Talking with an intelligent group of St. Petersburg revolutionaries I was informed that while they believed the strike would be victorious, they fully realized that they were staking everything upon the issue and that failure would set back their cause for several years. They said they were devoting their efforts to shaking the foundations of Russian finance, in full confidence that once the existing regime was overthrown they could as quickly build another and that foreign nations would be as ready to advance money to a democratic republic as to the autocracy. They emphatically denied that they were inciting the peasantry."
